this book presents evidence in support of the hypothesis that ship english of the early atlantic colonial period was a distinct variety with characteristic features it is motivated by the recognition that late seventeenth and early eighteenth century sailors speech was potentially an influential variety in nascent creoles and english varieties of the caribbean yet few academic studies have attempted to define the characteristics of this speech therefore the two principal aims of this study were firstly to outline the socio demographics of the maritime communities and examine how variant linguistic features may have developed and spread among these communities and secondly to generate baseline data on the characteristic features of ship english the methodology s data collection strategy targeted written representations of sailors speech prepared or published between the dates 1620 and 1750 and prioritized documents that were composed by working mariners these written representations were then analyzed following a mixed methods triangulation design that converged the qualitative and quantitative data to determine plausible interpretations of the most likely spoken forms findings substantiate claims that there was a distinct dialect of english that was spoken by sailors during the period of early english colonial expansion they also suggest that ship english was a sociolect formed through the mixing leveling and simplification processes of koinization indicators suggest that this occupation specific variety stabilized and spread in maritime communities through predominantly oral speech practices and strong affiliations among groups of sailors it was also transferred to port communities and sailors home regions through regular contact between sailors speaking this sociolect and the land based service providers and communities that maintained and supplied the fleets linguistic data show that morphological characteristics of ship english are evident at the word level and syntactic characteristics are evident not only in phrase construction but also at the larger clause and sentence levels whilst discourse is marked by characteristic patterns of subordination and culture

specific interjection patterns the newly identified characteristics of ship english detailed here provide baseline data that may now serve as an entry point for scholars to integrate this language variety into the discourse on dialect variation in early modern english period and the theories on pidgin and creole genesis as a result of language contact in the early colonial period

The Curious Case of "Subject to Contract, Contract Denied": Navigating the Labyrinth of Real Estate

Imagine this: you've found your dream home, the offer's been accepted, and you're already planning your housewarming party. But then, a chilling phrase appears: "Subject to Contract, Contract Denied." Your dream home suddenly feels a distant prospect. This seemingly simple phrase can unravel even the most carefully laid plans in the property market. This article unravels the mystery behind "subject to contract, contract denied," explaining its implications and how to navigate this tricky situation.

Understanding "Subject to Contract"

The phrase "subject to contract" (STC) is a crucial legal safeguard in property transactions. It essentially means that an agreement is not legally binding until formal contracts are exchanged between the buyer and the seller. Think of it as a preliminary agreement, a handshake rather than a legally signed document. Both parties agree on the major terms – price, completion date, fixtures and fittings – but these are contingent upon the final contract being signed. This protects both sides. The buyer can undertake further due diligence (surveys, legal checks) and the seller remains free to consider other offers until contracts are exchanged. Imagine two parties agreeing on a car sale. They verbally agree on the price, but until the paperwork is signed and the money exchanged, the deal isn't final. "Subject to contract" operates similarly in property. Until the contract is signed, either party can walk away without penalty.

The Role of Solicitors and Due Diligence

Once an offer is accepted subject to contract, both buyer and seller instruct solicitors. The buyer's solicitor will undertake a range of due diligence checks, including:

Searches: Local authority searches reveal planning permissions, restrictions, and potential problems with the property. Environmental searches uncover potential contamination risks. **Surveys:** A structural survey identifies any structural defects or issues that might need costly repairs. A valuation ensures the property is worth the agreed price. **Title Deeds Examination:** The solicitor examines the title deeds to ensure the seller has the legal right to sell the property and that there are no hidden encumbrances (like mortgages or other claims). Similarly, the seller's solicitor ensures the buyer's funding is in place and that all other conditions of the sale are met.

Why "Contract Denied" Occurs

Despite the preliminary agreement, a deal can still fall through even after "subject to contract" is agreed upon. This usually happens because of issues discovered during the due diligence phase. Reasons for a contract being denied include: **Unacceptable Survey Results:** The survey might reveal significant structural problems, making the property too expensive to repair or even unsafe. **Unsatisfactory Searches:** Local authority or environmental searches might uncover issues like planning disputes, contamination, or restrictive covenants impacting the property's use. **Title Problems:** Problems with the property's ownership or the presence of undisclosed encumbrances can invalidate the sale. **Funding Issues:** The buyer might be unable to secure the necessary mortgage or other financing. **Change of Circumstances:** Life happens. Unexpected events on either the buyer's or seller's side can lead to the withdrawal of the offer. For example, a job loss for the buyer or a better offer from a different buyer for the seller.

What Happens After "Subject to Contract, Contract Denied"?

When a contract is denied, the deal collapses. The preliminary agreement becomes void, and neither party is legally obligated to proceed. While disappointing, it's crucial to

understand that it's not necessarily a reflection on either party's integrity. It simply highlights the importance of thorough due diligence in property transactions. Both buyer and seller should consult their solicitors to understand the implications and any next steps.

Navigating the Process Effectively

To minimize the chances of a contract being denied, both buyers and sellers should:

- Engage a reputable solicitor early: Expert legal advice is vital throughout the process.
- Undertake thorough due diligence: This minimizes surprises and prevents unexpected issues from derailing the sale.
- Clear communication: Open and honest communication between both parties and their solicitors is essential to address potential problems promptly.
- Realistic expectations: Understand that property transactions can be complex and that delays or setbacks are possible.

Reflective Summary

The seemingly straightforward phrase "subject to contract, contract denied" masks a complex legal and practical reality in property transactions. The "subject to contract" clause provides crucial protection for both buyer and seller during the initial stages of a property sale. However, thorough due diligence is paramount to ensure that the sale proceeds smoothly. Issues discovered during this phase, ranging from structural problems to title defects, can lead to the contract being denied. Open communication, professional legal advice, and realistic expectations are key to navigating this often challenging aspect of property purchasing.

FAQs

1. Can I sue if my offer is denied after being accepted subject to contract? Generally, no. As the agreement was subject to contract, it wasn't legally binding until contracts were exchanged. 2. What happens to my deposit if the contract is denied? The deposit should be returned to the buyer if the contract is denied due to issues unrelated to the buyer's conduct. 3. Is it common for contracts to be denied? While not ideal, it's not uncommon for contracts to be denied due to issues discovered

during due diligence. 4. How long does the "subject to contract" period typically last? This varies, but it can typically range from a few weeks to a couple of months, depending on the complexity of the transaction and the speed of solicitors and surveyors. 5. Can I still negotiate after a contract is denied? Once a contract is denied, it usually signifies the end of negotiations unless both parties are willing to renegotiate terms based on the reason for the denial. This is usually rare and requires considerable goodwill from both sides.
